

EXCERPT FROM THE FIRE PROTECTION POLICY

The persons, external service providers or contractors staying in the facility shall observe the fire protection and safety rules valid here.

In case of group work, the contractor employer shall ensure the following.

- The identification of the responsible foreman of the group
- Notifying the members of the group of the contents of the present excerpt

Smoking in the facility is allowed exclusively outside of the buildings, on the smoking spots designated for smoking in the factory yard.

Any task including work with fire hazard shall be discussed with the contact person in advance. Such work may be started only with the countersigning of the contact person, and must have a valid written permit.

During production downtime, the responsible foreman under Section 2 shall inform the security service and the contact person of the start and finish of the work with fire hazard, as well as the exact place of the work.

- Before the commencement of the work, the parties shall become aware of the location of the fire extinguishing devices in the vicinity, as well as of the fire alarm system. If necessary, the responsible foreman shall educate his/her workers regarding the use of the devices, and determine the rules of conduct.
- The equipment of Schaeffler Savaria Kft. shall not be used for securing the site of the work.

The vehicle necessary for the task may be placed at least 3 meters from the exit of the building, subject to the prior approval of the contact person and the security service. Waiting is not allowed on the road sections leading to the fire extinguishing water sources.

The security service shall be notified of any fire or the immediate danger thereof without delay
